Slurry Inoculant

If you have emptied your slurry tank in the last few weeks and are storing the slurry until the Summer, consider adding inoculant now to ease your agitation problems later on.

1 Kg of Slurry Inoculant will treat 200,000 litres of slurry.

Simply mix with water, add the product when the tank is 1/3 full, agitate.

Ideally leave for 12 weeks and then spread. **1kg €35.00**

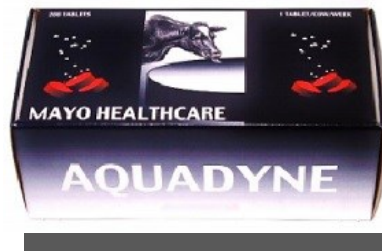

Iodine Deficiency

Pour On Iodine for

Iodine Deficiency

- 2.5ml per 50kg
- Apply every 3 weeks
- 5 Litre pack treats 166 cows
