UR: 10718-0076-10004-7530

DIRECTIONS FOR USE

DB PLUS should be applied at the rate of 7 litres / hectare in 200-450 litres of water. Use the higher water volume where the crop is dense, especially where perennial weeds are present.

Always add DB PLUS to the water in the spray tank whilst it is being filled with clean water. Agitate gently on the return system when full.

Do not spray if the crop is under stress from drought, or waterlogging.

NEW SOWN GRASS-SILAGE SWARDS

Spray when the majority of clover seedlings have one trifoliate leaf. With red clover, some leaf deformity may be observed but subsequent growth will be normal. Do not use on crops of clover to be taken for seed, nor on crops of established clover.

TIME OF APPLICATION

Spraying should only be carried out in good growing weather.

Crop	Max single dose	Max. no. of applications	Max. total dose	Latest time of application
Newly sown Red clover swards	7 L/ha	-	7 L/ha/year	-

WARNING

DO NOT roll within a few days before or after spraying.

DO NOT spray immediately before or after sowing any crop.

DO NOT spray when heavy rain is imminent or falling.

WASH EQUIPMENT thoroughly with water and a wetting agent or detergent immediately after use. Wash out again with clean water before using another product.

Avoid spray drift – DO NOT spray in windy weather.

SPECIFIC WEEDS CONTROLLED:

PERENNIAL WEEDS		
Moderately Resistant (MR) Moderately Susceptible (MS) Resistant (R)		
	Shoots	Long term
Broadleaved Dock	MR	R
Curled Dock	MS	MR
