- Comes in Blue/Red

€19
PER MAT

TEAT DIP

Boost milk quality by using Dual dip supreme or Blue Barrier Teat Spray

According to Teagasc research, a teat dip must achieve an inhibition score of 18 or higher to be effective against all three bacteria strains that cause mastitis.

- Both our Dual dip Supreme and Blue Barrier Teat Spray score higher than those recommended by Teagasc
- Blue barrier spray also has a higher level of emollients and is ph buffered giving it greater disinfecting power

DETERGENTS

Buyrite Chlorine Free contains 29% caustic, compared to other chlorine-free detergents with as little as 11%. At Buyrite Solutions, we prioritise quality products for our members while keeping prices competitive. When selecting your detergent, always check its caustic level

- Peracetic Acid 25L €55 & 200L €425
- Chlorine Free 25L €57 & 200L €370
- Coldwash powder 25kg €60
- Descale 25L €74 & 205L €470 0.5% Usage Rate

TEAT SEALERS

INTERNAL TEAT SEAL

FOR THE PREVENTION OF ASCENDING INTRAMAMMARY INFECTIONS THROUGHOUT THE DRY PERIOD

BLUE SEAL

- Blue Seal dry cow sealant gel is suitable for short term aid in sealing teat ends.
- Gives protection for up to 10 days after drying off
- Sealant may be removed at any stage by peeling away from skin.

PARLAC

- Parlac is a Natural solution to reduce milk production and leakage when drying off cows, this will minimize infection risk in healthy cows
- No need for antibiotics
- 1 litre treats 10 cows
- 100ml per cow
- Administered orally after final milking
- Can be used with both internal teat sealers and antibiotics
- Works within 48 to 60 hrs

DIESEL

Did you know?

*We also source and supply diesel
for our members!*

MINERAL BUCKETS

Our two main mineral buckets are specially designed to provide complete macro, micro, and trace element nutrition. They contain four forms of Copper, Zinc, and Buffers, optimised for absorption and effectiveness. The 4-way Buffer helps prevent acidosis, lameness, poor condition, and scour, while the low molasses content allows for higher mineral inclusion.

QUADFORCE HIGH MAG PRE CALVER

For Pre & Post Calving Dairy and Suckler Cows.

This has been formulated to support the cow and calf both before and after calving. The main issues around calving are

- 15% Magnesium
- Embryonic Loss
- High Molybdenum
- Retained Placenta
- Lameness
- Poor Milk Yield
- Milk Fever
- Tetany
- Poor Heart/Hormonal Functionality
- SCC - Poor Calf Thrive

QUADFORCE DAIRY/BEEF/HEIFER

For Cattle, Calves, Dairy Cows and Heifers. Formulated to support the requirements of replacement heifers and weaned youngstock. Issues affecting these animals include

- Poor thrive
- Reduced Pica/Phos Deficiency
- Slow Growth
- Brittle Bones
- Scour
- Coughing/Respiratory Issues
- Rough/Dull Coat
